

The Changing Business Communications Landscape

Three Defining Statistics to Know

61%

of businesses with traditional phone systems adopt VoIP phone systems at the end of their contract.

150%

Trendsetting organizations were found to be 150% more likely to use mobile communications solutions than follower organizations who tend to play catch up.

34.3%

of businesses have reduced IT spending by an average of \$161k a year by eliminating redundant apps and shifting to cloud-based unified communications as a service (UCaaS) solutions.
