

Not 100% sold on IP Fax?

Here are five reasons that will move you and your team from consideration to action.

01

Cloudli Fax works with Cisco:

Cloudli is a member of the [Cisco Solution Partner Program](#), and is the only provider in that ecosystem to offer flexible, reliable real-time T.38 fax with options to meet fax requirements large and small. Making the switch is easy.

02

Fax isn't going anywhere:

According to an [IDC survey](#)¹, 82% of respondents noted that fax volumes are holding steady or even increasing.

03

Fax can be secure:

Fax is [harder to intercept](#) than unencrypted email. [Cloudli's CryptAgent](#) doubles down on that security, offering patented AES encryption on real-time fax so your data stays safe.

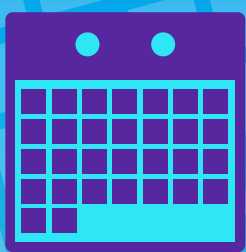

04

Fax use is even increasing:

That same [IDC survey](#)¹ noted that in organizations where fax use is growing, it's increasing by 27% year over year.

05

You've got nothing to lose:

Cloudli offers a [free 30-day trial](#) of its fax solutions. Sign-up now, try it for yourself and rest assured you're making the right decision for your business.
